

Agile Fundamentals for Business Professionals

1-day Training Course

OVERVIEW

While Agile originally emerged from the world of software development more than 20 years ago, many business (or non-IT) organisations are beginning to transform the way they work and deliver value to their Customers using Agile values, principles and methodologies. Organisations do so to meet increasingly challenging business goals by improving focus, productivity and team effectiveness.

“ People aren't happy because they're successful. They're successful because they're happy. ”

Jeff Sutherland, co-creator of Scrum

“ Great things in business are never done by one person. ”

Steve Jobs, Apple

[Read: Agile Ways of Working & Thinking](#)

This introductory 1-day Agile Fundamentals for Business Professionals training course is designed to provide participants with a deep and firm understanding of Agile history, its philosophies and its core values and principles. Participants will understand why Agile:

- *Increase workplace productivity and effectiveness*
- *Create innovative products and services wanted by Customer*
- *Help make better decisions in complicated and complex work environments*
- *Successfully deliver business goals and projects, on time and on budget*

In this course, you will learn:

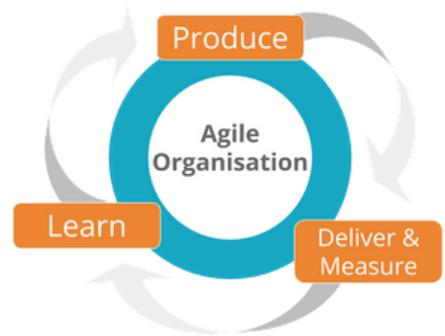

- *The fundamentals of Agile including history, Values, Principles & Methodologies*
- *Why the Agile mindset is an important capability to have in today's complex and unpredictable working environment*
- *Why today's world requires an abundance of curiosity, the willingness to collaborate and co-create, and an emphasis on true teamwork*
- *Case studies of organisations and teams transitioning to Agile ways of working*
